## Dream Screens

### Various Artists - "Dream Screens"

Conceived by Amie Neff M.Arch with the firm Grenier + Richards Architects, the "Dream Screens" project draws on the artistic skills and community spirit of a wide-ranging group of artists to decorate fabric privacy panels which will be installed in the re-conceived bunk beds in the 5th floor of the Webster Pavillon, and the 2nd floor of the Patricia McKenzie Pavillon.

Over 70 artists have come together to contribute to the "Dream Screens" projects with participation from:

- Professional Montreal and Toronto based-artists
- Youth involved with "Dans La Rue"
- Fine and Applied Art Students from Concordia University and
- Residents of the St. James Shelter among others.

Each panel will be individually decorated and ultimately installed in Old Brewery Mission beds as part of the OBM's ongoing dedication towards improving the quality of life of its clientele. The panels provide a more humane environment for them as they transition through the healing process on their journeys through and out of homelessness.
